WIND – A MULTI-DECADAL GROWTH STORY

~ 80 GW of wind capacity to be added in the next 8 years as per the National Electricity Plan – provides visibility of > Rs 6 trn for wind OEMs and a large multi-year opportunity for O&M service providers

India's power demand-supply mismatch to continue at least over the next decade

Wind continues to be one of the cheapest sources of power, competitive with Indian solar, much lower than APPC; tariffs discovered in the recent auctions ranged at Rs 3.4-3.5 / unit for Wind-Solar Hybrid and Rs 3.6-2.68 for plain vanilla wind projects

Hybrid / RTC / FDRE projects are the way forward due to: 1. Higher project PLFs, 2. Increased grid utilization, 3. Round-the-clock generation potentially replacing conventional sources for base power supply, 4. Lower LCoE and better IRRs for project developers

Strong growth in demand from commercial & industrial (C&I) players for renewable power due to its green credentials and large price arbitrage w.r.t. grid based / merchant power.

Draft proposal of domestic content requirement for wind turbines by NITI Aayog may lead to further consolidation of suppliers in the domestic market

India's Green Hydrogen targets of 5 mmtpa to require incremental 125 GW of RE capacity addition (solar & wind)

FAVORABLE MACRO ENVIRONMENT FOR THE INDIAN WIND SECTOR

7.4 GW capacity has been awarded in FY25 for wind / hybrid / FDRE projects

India to add > 300 GW of RE capacity by 2032

India's Renewable Energy Installed capacity target by 2032 as per NEP	596 GW	Capex required for ~ 440 GW of RE capacity addition over 2022-32	~ Rs 28 trn
India Solar Installed Capacity target by 2032 as per the NEP	365 GW	Capex required for ~ 311 GW of Solar capacity addition over 2022-32	~ Rs 15 trn
India Wind Installed Capacity target by 2032 as per the NEP	~125 GW	Capex required for ~ 89 GW of Wind capacity addition over 2022-32	~ Rs 6 trn
India BESS Installed Capacity target by 2032 as per the NEP	~47 GW / 236 GWh	Capex required for BESS capacity addition over 2022-32	~ Rs 3.5 trn

770 MW Wind Capacity was added in Q1 FY25; All-India RE capacity (ex-large hydro of 47GW) reached 148 GW in Jun'24

4.4 GW RE capacity was added in Q1 FY25

Cumulative RE capacity reached 148 GW

Organic growth prospects

- ✕ Growing portfolio through the entry of new long-term O&M contracts with customers who purchase IWL's WTGs – IWL's order book of 2.9 GW provides a very strong visibility.
- ✕ O&M contracts from group IPP platform, which targets 1.5 GW of installed capacity, to add to the growing portfolio.
- ✕ Revision/Reset of shared services / comprehensive O&M contracts.
- ✕ Value added services to contribute meaningfully to the topline.
